

DYNAMO L

Replacement for Lucas E3L, Lucas E3HM, Lucas E3LM, and Lucas E3N generators

Based on our experience in manufacturing DYNAMO (generator) devices for various motorcycles, we decided to expand our product range with the DYNAMO L series. The "L" designation in the model series refers to the original manufacturer, Lucas. Dynamo L serves as a replacement for Lucas E3L, Lucas E3HM, Lucas E3LM, and Lucas E3N generators. These devices have been designed in accordance with the installation guidelines for original Lucas and Miller generators, which were used in British motorcycles of various brands over the past hundred years.

The L-series Dynamo (generator) is a replacement for Lucas and Miller generators, maintaining the original external dimensions and installation principles of these generators. We offer a product that incorporates modern technology in a casing that closely resembles the original. Without any modifications to the motorcycle, it ensures the generation of sufficient energy for the proper functioning of the motorcycle, eliminating concerns about failures of old, worn-out dynamos.

Our designs were developed in collaboration with customers who, inspired by our passion, provided us with additional samples and assisted in creating improved replacements for generators:

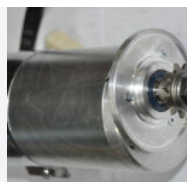

DYNAMO L1 Lucas E3LM 20012, 20013A, 20033, 20034
